With the holidays fast approaching how are you prepping your locks for some fun in the sun...?

If you have a holiday planned or thinking about a colour change, now would be the time to invest in some sound advice and hair care to protect your hair from damage.

We care about your hair and the results you want to achieve. So here are a few tips to start your summer right...

- Make sure you have regular hair cuts between 4 to 8 weeks apart depending on the style (yes even when you are growing it!) This will prevent breakage by removing the weaker ends
- Always without fail, use heat protection when using heat to style your hair. Like skin, hair is better when the moisture levels are protected as well as replenished. GHD Heat Protection Spray & Paul Mitchell Hot off the press are available in the salon shop
- Invest in an Olaplex service when having your hair coloured in salon to maintain the integrity & rebuild bonds in your hair to strengthen and protect it, especially if you are going for a lighter summer look. (Olaplex is also available in our Salon Shop for hair care at home)
